PROFESSIONAL SUMMARY

Product Manager (Technical) with 5 years of experience at JPMorgan Chase & Co. and Amazon, specializing in observability, cloud infrastructure, and ML-powered risk and compliance platforms for payment & banking products. Built 0->1 products across incident detection and distributed telemetry, serving 100M+ banking customers. Most recently launched automated intent-based chargeback enforcement at Amazon, projected to recover \$60M+ in bad debt. AWS Solutions Architect and Certified Kubernetes Application Developer (CKAD) certified.

EDUCATION

- | | | |
|--------------------|---|------------------|
| 2024 - 2026 | KELLOGG SCHOOL OF MANAGEMENT NORTHWESTERN UNIVERSITY
<i>Master of Business Administration, June 2026</i> <ul style="list-style-type: none">Majors: Technology Management, Marketing Coursework: Product Strategy, Data Analytics with AI SpecializationLeadership: Kellogg AI Club, Kellogg Tech Club, Kellogg Special-K (Musical Cast Member) | Evanston, IL |
| 2016 - 2020 | JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY
<i>Bachelor of Technology, Computer Science & Engineering, GPA: 8.58/10 (97th percentile)</i> <ul style="list-style-type: none">Awards: "Engineer of the Future", 1st place in National-wide AI Hackathon (720 teams)Leadership: President & Coach at Student Training Club - drove 80% tech internship conversions (cohort 150) | Hyderabad, India |

EXPERIENCE

- | | | |
|--|--|------------------|
| Summer 2025 | AMAZON
<i>Sr. Product Manager - Technical (Buyer Risk Protection)</i> <ul style="list-style-type: none">Authored product proposal (PRFAQ) and secured VP/Director approval for a \$1.5M investment to modernize chargeback recovery operations, replacing static rule-based workflows with personalized repayment experiencesDeveloped product strategy for an AI-powered chargeback enforcement workflow to reduce false-positive account actions; beta results showed false-positive enforcements down by 36% across 1.01M buyer accountsLed cross-functional Engineering, Ops, Risk and Applied AI teams to launch a beta self-service chargeback resolution experience in 90 days; increased chargeback repayments from 15% to 24%, projecting \$60M+ in bad debt recovery | Seattle, WA |
| 2020 - 2024
2022 - 2024 | JPMORGAN CHASE & CO.
<i>Product Manager - Technical (Observability & Cloud Infrastructure for Payment & Banking Products)</i> <ul style="list-style-type: none">Mitigated ~\$1.5B in legal and regulatory risk by implementing an ML-native data masking platform protecting sensitive data for 66M+ customers; identified early compliance gaps through production telemetry analysisLed 0->1 development of an enterprise observability platform unifying metrics, logs, and traces for SRE and developer incident response workflows; reduced P1 incidents by 34% across 200+ teams through proactive detectionReprioritized payment services roadmap to improve transaction reliability by aligning payments and infrastructure stakeholders; stabilized high-volume pipelines (100M TPS); reduced data loss 15% to 0.2% (saving \$1M/month)Drove adoption of an AWS cost optimization platform across 450 DevOps & platform teams by aligning stakeholders on optimization strategies; defined roadmap & API integration playbooks; reduced cloud spends by 22% (\$25M/year)Identified and escalated an OpenTelemetry defect impacting enterprise observability workflows after assessing downstream impact on 54 enterprise orgs; collaborated with external maintainers to resolve P1 issue within 2 days | Hyderabad, India |
| 2021 - 2022 | <i>Software Engineer II (Top 5% performer among 400+ cohort)</i> <ul style="list-style-type: none">Partnered with Applied ML, Fraud & Cybersecurity teams to implement RSA-based authentication workflow for bulk payments using transactional and behavioral risk signals; reduced fraud losses 17% for 10M+ SMB merchant accountsBuilt OpenTelemetry instrumentation capabilities into Chase's internal Spring Boot framework used across 5K+ banking products, standardizing telemetry, tracing, and service health metrics for enterprise observability workflowsDefined product scope and technical requirements to accelerate Kubernetes migration for legacy application teams; built adoption roadmap and training strategy, scaling platform adoption from 5% to 25% across 50+ global teams | |
| 2020 - 2021 | <i>Software Engineer I ("Youngest Engineer Excellence" among 3K+ engineers)</i> <ul style="list-style-type: none">Redesigned new-hire onboarding workflow by automating manual approval processes into a one-click onboarding system, reducing onboarding time by 58% (12 to 5 days) for 4K+ hires across 4 India offices | |

PROJECTS

- | | | |
|-------------|--|--|
| 2026 | PRISM - LLM-Powered Intervention System to reduce Remorse-Driven Returns (Independent Project)
Designed PRISM , an intervention system that uses behavioral signals and LLM-driven multi-agent orchestration to deliver real-time personalized interventions, reducing remorse-driven returns by 10% (\$170K-\$300K savings per 1M orders) | |
|-------------|--|--|

ADDITIONAL DATA

- AI/ML Skills:** Agentic AI workflows, Eval frameworks, ML model evaluation, GenAI product prototyping
- Technical Skills:** Java, Python, Spring Boot, RESTful APIs, SQL, CI/CD, Agile, DevOps, IaaS, SaaS, Grafana, Splunk
- Cloud Certifications:** AWS Solutions Architect (2022), Certified Kubernetes Application Developer (2021)
